What has been particularly effective about Juan Yamin Silva's approach to teaching in this course?

- He explained concepts clearly
- Juan is super approachable and knowledgeable about the subject. He is very helpful in building intuition and executing rigorous arguments related to the material.
- Juan would help me work through practice problems in office hours by asking me a lot of questions and breaking things down into small steps. It was extremely helpful for my learning, and I definitely retained the information a lot better than I would have if he just explained how to do the problems from start to finish. He did this all in a way that made me feel smart rather than overwhelmed, which is usually how I feel trying to do metrics. Thank you, Juan!! :)
- He responded to students' questions very quickly and in great detail, and was always willing to help students.

What specific advice would you have for Juan Yamin Silva about changes that would enhance your learning?

- No complaints.
